Diploma in Children's Studies

This course was sourced from OpenLearn under the Creative Commons licence conditions BY NC SA. The adapted version of the course on Alison.com is also published under the Creative Commons licence conditions BY NC SA. Children from birth to the age of 18 are now considered academically to represent a distinct sociological and cultural class. This means that children are studied as complete individuals in their own right, separate and distinct from adults.

Diploma in Educational Psychology

Educational psychology is concerned with how students learn and develop. It emphasizes trends in educational development while also focusing on educational diversity. For teachers and trainers to fulfill their instructional role most effectively, their teaching methods must be grounded in educational psychology. Educational psychology provides a framework for teachers and trainers to plan, create and deliver effective lessons, and assess each student's learning.

Introduction to Basic Electrical Drawings and Test Equipment

Installing a safe electrical system begins with a well-planned electrical drawing. Construction projects require work drawings and specifications to guide electricians in installing electrical equipment. Besides being a customer requirement, these plans and drawings provide specific instruction to electricians. Standard symbols and lines are used to represent the different types of material, raceways, conduits, and circuit connections.

Advanced Physics 1

An electric system consists of all of the elements needed to distribute electrical power. This course will first introduce you to current, charge, and voltage. You will study how electrons from a voltage or current flow on circuits and how capacitors store an electrical charge. You will also study the three types of transducers and how they convert energy from one form to another.

Introduction to Music Theory

This course begins by giving you an insight into where octaves come from. You will learn that musical notes, like all sounds, are made of evenly-spaced sound waves. You will study high and low frequencies, and learn that people have been making music and talking about music long before we knew that sounds were waves with frequencies. You will also learn that any note that is twice the frequency of another note is one octave higher.

Human Health - Health and Human Development

There are three aspects of social development in childhood. This course will discuss why play is important, learning is intense, and social rules and acceptable behavior are learned in this stage. This course will also discuss chromosomes which are the structures that contain genes. You will learn that humans have 23 pairs of chromosomes and that genes determine physical characteristics in relation to a person's body shape, rate of maturation, and body size.
